

RESOLUTION NO. ____

Adopted by the Sacramento City Council

IMPLEMENTING STAGE [1][2][3][4] OF THE CITY OF SACRAMENTO WATER
SHORTAGE CONTINGENCY PLAN

BACKGROUND

- A. The City of Sacramento has three water supply sources: American River water, Sacramento River water and groundwater. Normally, the City's water supplies are adequate to meet the City's retail and wholesale water demands. However, because of *[on-going drought conditions statewide][the required shutdown of the City's Fairbairn Water Treatment Plant/Sacramento River Water Treatment Plant due to _____][or describe other event]*, the Sacramento City Council has determined that it is necessary to enact water conservation measures and water use restrictions, in addition to those already included in the City ~~Municipal~~ Code (Chapter 13.04 Water Service System, Article XI Water Conservation), as authorized under City Code section _____, in order to reduce water use within the City's water service area.
- B. On January 28, 1992, the Sacramento City Council adopted a Water Shortage Contingency Plan that included four water conservation stages for a reduction in water use of up to 50 percent.

Water Conservation Stage

Water Use Reduction Goal

Stage 1	10 to 20%
Stage 2	20 to 30%
Stage 3	30 to 40%
Stage 4	40 to 50%

Each water conservation stage includes specific water conservation measures and water use restrictions designed to conserve water. Implementation of the water conservation
